***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-37 and 59-112, drawn to a process for reducing corrosion in an MTO effluent processing system comprising quenching the product stream to form a light product fraction, a heavy product fraction, and a condensed pumparound stream, classified in class 585, subclass 638 and 950.
- II. Claims 38-58, drawn to a process for reducing corrosion in an MTO effluent processing system comprising quenching the product stream to form a first overhead stream and a first bottoms stream, sending at least a portion of the first bottoms stream to a condensate stripper and heating said bottoms stream to form a second overhead stream and a second bottoms stream, classified in class 585, subclass 638 and 950.

The inventions are distinct, each from the other because of the following reasons:

Group I does not require the additional step of stripping to form second overhead stream and a second bottoms stream and further treating said streams.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 1764

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
